

ENVIRONMENTAL

Georgiou is committed to minimising its impact on the natural environment and social surroundings for the benefit of current and future generations. This will be achieved through continual improvement of the Georgiou Environmental Management System and subsequent enhanced environmental performance.

To achieve this commitment, Georgiou will:

- Set, monitor and review measurable environmental objectives and targets of all Georgiou activities.
- Build and maintain positive relationships with the community and stakeholders.
- Comply with all applicable environmental laws, regulations, statutory obligations and client environmental requirements.
- Proactively identifying significant environmental aspects and implement effective pollution prevention and control measures to protect heritage, biodiversity, land and waterways.
- Manage potential community impacts related to air quality, noise and vibration.
- Promote responsible resource use and waste management, including the efficient use, reuse and recycling of resources.
- Promote / drive awareness of relevant environmental legal obligations.
- Ensure the continued effectiveness and improvement of Georgiou's management system and practices to meet its business needs, AS/NZS ISO 14001, client and other obligations.
- Hold employees and subcontractors accountable for proactively meeting their environmental responsibilities.

Achieving these commitments is fundamental in demonstrating a positive impact on the environment and communities associated with Georgiou's activities.
