

Night works for the Northern Road upgrade between Mersey Road and Eaton Road

I (first and last name) _____

Of (address) _____

am aware that I live in an area where out of hours work will be taking place at various points throughout construction of the project. The below work activities will occur at various times, but no more than 3 nights a week at critical stages of construction.

It has been explained to me and I understand these works will consist of:

- Profiling;
- Asphaltting;
- Drainage;
- Traffic Switches; and
- Line Marking;

These works will take place at night to minimise impacts to motorists using the Northern Road and to minimise disruption to local businesses.

Normal community consultation will take place as usual, and you will be informed well ahead of time before any night works.

I understand if I have any questions relating to the construction, I can contact the Georgiou Ertech Joint Venture (GEJV) team on 0438 654 860 and email thenorthernroad@rms.nsw.gov.au.
